

Module	test case ID	test case description	Steps for testing	Test data	Expected results	Fail/Pass
Uniprot	P06213	To test given protein database	the URL "www.uniprot.org" 2.search the insulin 3.click on first entry 4.explore the result	Test the given ID and check weather the given information is correct or incorrect	given id is incorrect and information correct given id is correct and information also correct given id is incorrect and information correct given id is correct and information also correct	pass
swissprot	4xxd	To test given protein database	the URL "www.swissprot.org" search the protein click on first entry explore the result	Test the given ID and check weather the given information is correct or incorrect	given id is incorrect and information correct given id is correct and information also correct given id is incorrect and information correct given id is correct and information also correct	pass
pfam	1ngk	To test given hemoglobin database	the URL "www.pfam.org" search the hemoglobin click on first entry explore the result	Test the given ID and check weather the given information is correct or incorrect	given id is incorrect and information correct given id is correct and information also correct given id is incorrect and information correct given id is correct and information also correct	pass
PDB	2zhv	To test given ligand database	the URL "www.pdb.org" search the ligand id click on the id explore the result	Test the given ID and check weather the given information is correct or incorrect	given id is incorrect and information correct given id is correct and information also correct given id is incorrect and information correct given id is correct and information also correct	Pass
String	P00493	To test given protein database	the URL "www.string.org" search the protein id click on the id explore the result	Test the given ID and check weather the given information is correct or incorrect	given id is incorrect and information correct given id is correct and information also correct given id is incorrect and information correct given id is correct and information also correct	pass
